

## INSTRUCTIONS TO AUTHORS

The Iraqi Journal of Community Medicine is published four times a year by the Iraqi Community Medicine Society (ICMS), Community Medicine Dept Al-Mustansiriya Medical College.

The Journal invites work, clinical epidemiological research in various fields of medical practice particularly in different branches of Community Medicine. Papers in Arabic and English are accepted from any country with the understanding that the work described is original and not being or already submitted for publication elsewhere.

Each manuscript will be screened by the editorial board & referred to two specialists in the field of the subject concerned.

**Manuscript:** Should be sent to the editorial managing in **THREE** complete sets in double space with liberal margins on one side of the paper only together with **CD**. A covering letter signed by all authors should be sent with the manuscript: a) Identify the main author. b) Give full name (first and last) for all authors (in English or Arabic); degrees and address. c) Include evidence for prior approval of the ethical committee in the institution where the work was carried out if it deals with human experimentation. d) Include a written statement permitting use of material from other sources.

The journal adopts the Vancouver style. Each part of the manuscript should begin in a new page and in the following sequence:

1. **Title page:** Concise information title (in English and Arabic).
2. **Summary:** In English and Arabic of not more than 150 words stating purpose, basic procedures, main finding, and principal conclusions.
3. **Key word:** for indexing, about four subjects heading should be included. As far possible, those headings should be selected from the National Library of Medicine's Medical Subject Heading to ensure the control of index terms.
4. **Text:** a) Introduction: state purpose and rational of study with pertinent references. b) Materials and Methods: selection of subjects, identification of methods, apparatuses in chemical used and include statistical analysis when appropriate. c) Results: present in logical sequence preferably with tables and illustrations emphasizing in the text only important observations. d) Discussion: emphasize new aspect of the study and implication and relate to other relevant studies.
5. **References:** Number references consecutively in the order in which they are first mentioned in the text using the form adopted in Index Medicus. **List all authors without *et.al***. Example: Mossawy S.J., Khalili A. H., and Killinchi A. S. Reaction time measurements to visual stimuli in patients suffering from cervical spondylosis. J. Fac. Med. Bagh, 1987; 29 (4): 375-85.
6. **Illustrations:** Should be clearly marked on their backs. Explanatory legends should be typed on a separate sheet of paper. Drawings should be in a finished state suitable for reproduction.
7. **Tables:** Should be typed on separate sheets from the text. All illustrations and tables must be referred to in the text.

**Proofs:** The authors will receive a proof of his paper prior to printing. Corrected proofs should be returned to the managing editor as soon as possible with.
